

# Best Bespoke Health & Beauty Treatment Services Salon 2022

When looking for beauty treatments, we can find a world full of pledges and not much to follow them up. Founded by the passionate Mohbeen Karim, multi-award-winning Venus Health & Beauty Limited is a bespoke beauty brand making its mark on the beauty industry. Offering more than empty promises, Venus is teaching us that feeling good in our own skin is more than possible – it is essential.

February 2010 saw Venus Health & Beauty pop up on the scene. Based in Old Woking, Surrey, Venus is in a prime location for locals and those coming from afar. What's more, Venus' clients are of all ages and backgrounds, with varying levels of needs and wishes. Mohbeen, and Venus, always put their needs first so that they can feel both heard and completely pampered.

Its dedicated Founder, Mohbeen Karim, is always searching for new ways to make people feel good about themselves. Mohbeen always had a drive towards health and beauty since her teenage years. She then grew to gain her Masters' degree, before transforming all of her dreams into a career. She has excelled through every endeavour and will continue to do so throughout the years to come.

With her passion for health and beauty, and top-tier customer service, Mohbeen set up the unparalleled Venus – and continually strives to be the best in the area. Mohbeen states, "Our objective is that we want our clients to not only feel a million dollars but also feel like they have been listened to, understood and received an exceptional and personalised service.

"These are our key differentiators from the competition. A testament to the level of service provided, over 90% of new business is based on customer referrals." Not only does Venus receive a huge number of word-of-mouth referrals, but it also receives astonishing reviews from all of its customers.

Venus' treatments consist of Medispa, skincare, aesthetics, a light lounge, and a hair salon. As Mohbeen gained more qualifications, such as specialist non-surgical beauty treatments, she decided to open up her salon to a plethora of solutions. These services include, Intense Pulse Light (IPL), Dermaluxe LED Phototherapy, KRF

Radio Frequency, and more, to achieve great results – without going under the knife.

All of these skin treatments involve technology to target any blemishes or unwanted textures and wrinkles – some more suited to certain concerns than others, but all with the ability to help us feel more positive in our own skin. Results can usually be seen in around three treatments, and the results stand the test of time – so that we can be sure that our confidence lasts, too.

Offering clients 360 degree skincare programmes, Venus joins their skin journey and is there from beginning to end. This is so that clients can feel valued, understood, and supported throughout their development.

Winning Best Non-Surgical Treatment Service Salon, South East, in the Southern Enterprise Awards last year is just another example of how Venus has gained a marvellous reputation for itself, and Mohbeen. We are sure to see it win more awards throughout the years.

Now that Venus Health & Beauty Limited has won Best Bespoke Health & Beauty Treatment Services Salon 2022 it has yet another award under its belt, and will go on to exceed all expectations in the coming years.
